

AFFORDABLE GPS LOCATION TECHNOLOGY

ASSET TRACKING

Easily find your lost or stolen property

INCREASE YOUR CHANCE FOR RECOVERY

An emergency, theft or once-in-a-lifetime event rarely announces when it will suddenly take your property when you need it most.

That's where GPS-powered tracking devices can play a vital role.

While many municipalities have for years depended on GPS-enabled fleet tracking to help them manage their vehicles, a new trend is emerging in which every asset can be affordably tracked. This powerful technology ensures your department is ready whenever the need arises.

With nearly two decades experience in the GPS tracking industry, Synovia has exactly what it takes to easily track your vehicles and assets and get them returned.

WHEN THINGS GO Missing

Eliminate loss of expensive and irreplaceable items with powerful location technology so you can recover them swiftly

Know where all of your assets are at all times so when the unexpected happens you can increase your chances of getting them recovered.

Peace of Mind Preparation

Know where equipment such as generators, backhoes, lawnmowers, powerwashers, anything that can cost hundreds if not thousands of dollars to replace are located.

The Technology that Keeps You Ready

Receive alerts within minutes or seconds whenever an asset or vehicle is leaving a geographic location you determine and when it is returned.

Smarter Fleet Tracking and Customer Service

Every one of our customers has a dedicated Fleet Advisor who will serve as their primary point of contact for the life of a contract. Think of them like you do your dentist, physician or skilled tradesman, your Fleet Advisor knows your fleet's history, your needs and where you want to go in the future.
