SMARTER FLEET
Management

Synovia's real time reporting adds another layer of technology that can save money, improve service and enhance safety.

Technology that delivers real-time performance information including smarter reporting, tracking stolen assets and geo-fences to keep you informed.

Improved Fleet Reporting

Ensure peak efficiency with detailed safety data points like speeding, harsh braking/turning or any other kind of aggressive driving. Powerful metrics for lowering fuel costs by slashing excessive idling.

Easily Track Stolen Assets

See anauthorized vehicle use and track them to recover your property.

Covers All The Bases

Pre-position vehicles to maximize use in any situation, streamline federal reporting requirements, defend your employees and have hard data during legal proceedings. Create geo-fences to know when your buses depart the yard of visit no-go areas.
