MOBILITY MEETS EFFICIENCY

Intelligence at your fingertips for a smarter school bus experience

STUDENT RIDERSHIP - NAVIGATION - TIME & ATTENDANCE

• Stronger connections between Students & Parents
• Streamlined Medicaid reporting for Special Ed students
• Smoother operations for substitute drivers
• Streamline payroll to save money
• Two-way communications with fleet manager
• Emergency call button for increased safety

Easy-to-use tablet delivers navigation, student ridership, and driver Time & Attendance
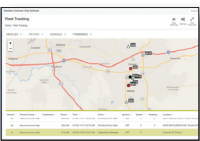

At Your Fingertips

Turn-by-turn directions and digital ridership lists provide drivers improved accuracy and eliminate paper. Efficient, accurate, environmentally friendly for an improved school bus experience.

Driver Login

Drivers won't punch a time clock in the garage or office. They start their work by clocking in with the tablet on the bus, saving time and money and increasing efficiency.

Real-time Data

When students board the bus their names and pictures appear on the tablet, making it easier to know who they are, if they're on the correct bus, and boarding or departing at the correct stop.

Powerful Navigation

Navigation designed specifically for school buses. Seamless integration with GPS hardware, using the power of routing to safely navigate planned bus runs and routes. Smoother experience for substitute drivers.
